

BELLACROFT TRAINING ACADEMY

Certified Rife Frequency Practitioner

Professional practitioner training in responsible frequency-based complementary practice

LEARN • PRACTISE • DEMONSTRATE • CERTIFY

The graphic features the Bellacroft Training Academy logo on the left, which includes a stylized figure with wings and the text 'bellacroft'. To the right of the logo, the text 'BELLACROFT TRAINING ACADEMY' is displayed in a large, bold, serif font, with 'PROFESSIONAL • PRACTICAL • COMPASSIONATE' in a smaller font below it. The main title 'Certified Rife Frequency Practitioner' is written in a large, bold, purple font. Below this, a subtitle reads 'Professional practitioner training in responsible frequency-based complementary practice.' The background of the graphic shows two women, one writing in a notebook and the other looking on, with a sign in the background that says 'LEARN DEVELOP GROW'. At the bottom, there are four icons representing the training process: a graduation cap for 'LEARN', a gear for 'PRACTISE', a group of people for 'DEMONSTRATE', and a certificate for 'CERTIFY'. To the right of the women, there are three books stacked vertically with the titles 'FREQUENCIES', 'PRACTICE', and 'CLIENT CARE'.

Course Overview

The Bellacraft Certified Rife Frequency Practitioner program is a structured practitioner pathway combining frequency technology, holistic wellbeing principles, supervised practical experience, client care, professional practice and demonstrated competency.

The program retains the current 14-week blended format - typically around eight hours of study per week, with online learning and in-clinic practical training - while strengthening client safety, ethical practice, scope of practice and practitioner competency.

Positioning statement

Graduates are trained to provide complementary frequency-based wellbeing services within their demonstrated competency and to work alongside, not in place of, appropriately qualified medical and allied-health professionals.

Who the Course Is For

- People seeking a structured pathway into complementary frequency-based wellbeing practice.
- Existing complementary or allied-health practitioners wishing to add frequency technologies within an appropriate scope of practice.
- Students interested in combining technical equipment competency with client-centred, ethical practitioner skills.

Course Structure

Module	Title	Primary Focus	Delivery
1	Foundations of Rife Frequency Practice & Equipment Operation	History, terminology, equipment setup, software, remote applications, safety and records	Online + clinic
2	Principles of Holistic & Frequency-Based Wellbeing	Holistic wellbeing, anatomy/physiology foundations, observation, scope and referral	Online + clinic
3	Applied Frequency Technologies	Plasma, remote/contact/scalar applications where relevant, program selection, precautions and supervised practice	Online + clinic
4	Foundations of Nutrition, Lifestyle & Wellbeing	General nutrition, hydration, sleep, movement, stress, lifestyle and referral boundaries	Online

Module	Title	Primary Focus	Delivery
5	Professional Practice, Ethics & Client Safety	Consent, records, privacy, boundaries, contraindications, red flags, referrals, insurance and advertising	Online + clinic
6	Advanced Practice, Practitioner Awareness & Integration	Advanced applications, practitioner awareness, intuition within boundaries, case integration and self-management	Online + clinic
7	Supervised Clinical Practice & Final Practitioner Competency	Case work, observed practical assessment, safety/scope judgement and certification decision	Clinic

Module Detail

Module 1 - Foundations of Rife Frequency Practice & Equipment Operation

- Introduction to frequency-based complementary practice and Rife concepts.
- Fundamental frequency terminology and introduction to the Spooky2 system.
- Generators, accessories, software navigation, equipment setup and remote applications.
- Manufacturer instructions, equipment hygiene, maintenance, troubleshooting and session records.
- Safe explanation of equipment use without unsubstantiated medical or therapeutic claims.

Module 2 - Principles of Holistic & Frequency-Based Wellbeing

- Bellacraft's holistic wellbeing philosophy and major influences on wellbeing.
- Foundations of anatomy, physiology, major body systems and homeostasis.
- Complementary versus conventional healthcare; practitioner observation versus medical diagnosis.
- Recognising when symptoms or presentations require referral to medical or allied-health professionals.

Module 3 - Applied Frequency Technologies

- Frequency delivery methods, including plasma and other applications included in the Bellacraft training system.
- Equipment configuration, program selection, documentation and manufacturer protocols.
- Client comfort, precautions, contraindications, unexpected responses and when not to proceed.
- Supervised practical application and case-based decision making.

Module 4 - Foundations of Nutrition, Lifestyle & Wellbeing

- Foundational nutrition, hydration, sleep, movement, stress and balanced lifestyle principles.
- General wellbeing education within practitioner competency.
- Boundaries around therapeutic nutrition, supplements, medications and individualised dietary advice.
- Referral where needs fall outside the practitioner's training.

Module 5 - Professional Practice, Ethics & Client Safety

- Bellacraft Code of Ethics and Scope of Practice.
- National Code of Conduct for Health Care Workers and applicable professional responsibilities.
- Informed consent, client intake, health history, confidentiality, privacy and record keeping.
- Contraindications, vulnerable clients, minors, pregnancy, medical red flags and referral/escalation.
- Insurance, complaints handling, professional boundaries, advertising, health claims and testimonials.

Module 6 - Advanced Practice, Practitioner Awareness & Integration

- Advanced frequency applications and integrated client-centred session planning.
- Practitioner observation, listening, intuitive awareness and recognising assumptions or bias.
- Monitoring and documenting client-reported experiences without presenting intuition as medical diagnosis.
- Professional limits, practitioner wellbeing, supervision and continuing development.

Module 7 - Supervised Clinical Practice & Final Practitioner Competency

- Supervised client sessions and case studies.
- Written knowledge assessment and practical equipment assessment.
- Observed client consultation, ethics and scope-of-practice scenarios.
- Final assessment across technical competency, client competency, safety/scope judgement and professional practice.

Certification Standard

Completion of the seven modules does not automatically result in certification. The Bellacraft Certified Rife Frequency Practitioner designation is awarded only after the student demonstrates the required standard of knowledge, technical skill, client care, safety judgement and professional competency.

Certification language

Proposed certificate wording: Certificate of Competency in Rife Frequency Practice. Graduate designation: Bellacraft Certified Rife Frequency Practitioner.

Recommended disclosure: This is a private practitioner-training certification issued by Bellacraft Training Academy. It is not an Australian Qualifications Framework (AQF) qualification and does not confer registration under the National Registration and Accreditation Scheme.

Course Investment

Rather than presenting each module as a separately purchased product, the course should be offered as one integrated practitioner program with different payment methods.

Option	Proposed presentation
Pay in full	Program Fee: \$2,200
Payment plan	Pay as You Go: \$2,310 — 4 payments of \$577.50

Equipment & Textbook Pathways

The current outline presents approximately \$11,000 of Spooky2 equipment plus \$300-\$500 of textbooks as additional costs. That creates a potential \$13,000+ entry point and may deter otherwise suitable students. The cost should not be hidden; instead, Bellacraft should investigate staged equipment pathways.

Pathway	Concept
Training Access	Students use Bellacraft clinic equipment during supervised practical training where feasible.
Practitioner Starter	Minimum equipment genuinely required to begin professional practice, subject to supplier/manufacture and regulatory requirements.
Professional Clinic	Full recommended equipment suite for graduates who want the complete Bellacraft clinic setup.
